

Why join Microalgae Australia?

As a member of the national peak body representing Australia's microalgae value chain, you will connect with growers, technology providers, processors, product developers, researchers, investors & policy makers.

Microalgae Australia is the national platform for all microalgae-related industries, designed to strengthen the sector's voice, align standards, influence optimal policy settings and unlock new commercial opportunities. By joining, you gain access to a coordinated, cross-sector network that positions microalgae as a 'ready to go' core solution for Australia's low-carbon, food feed and fuel secure, circular economy future.

Benefits
